EXPERIENCE

I have been learning C++ for about 3 years and doing different types of projects dealing with C++. I have recently learned to use different algorithms to finish certain activities efficiently.

I have learned Machine Learning discreetly, and did small projects using the MARS website.

I have also learned Linux for a while and use terminal to navigate around files, edit them, and etc.

EDUCATION

Bachelor of Arts, Computer Science

CUNY-Hunter College

NYC, NY

Expected Graduation in May 2022

PROJECTS

The projects that I have done for the past 3 years were all C++ related.

Some of these projects include:

1) Creating classes to sort different files
2) Creating algorithms to deal with matrices
3) Writing hard code, to process audio arrays
4) Manipulating Vectors

And etc.

SKILLS

C++

Mips

Linux

Python

HTML

CSS

MS Office (Word, Excel, Powerpoint)

Summary

I am a CS student at Hunter College, looking to gain more experience in Computer Science. I want to gain more experience in coding and learn how complex the working environment is. I am interested in virtual remote work.

LANGUAGES

English, Urdu
